SERVICE AND REGULATORY ANNOUNCEMENTS

BUREAU OF ANIMAL INDUSTRY

AUGUST, 1925

[This publication is issued monthly for the dissemination of information, instructions, ruling, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 25 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

AMENDMENT TO MEAT-INSPECTION REGULATIONS

Amendment 3 to B. A. I. Order 211 (revised) has been issued to take effect on October 1. The principal changes involved are as follows:

1. Carcasses and parts passed for sterilization may be marked "Passed for cooking," and products prepared from such carcasses and parts may be marked "Prepared from product passed after cooking." Provision for the use of the statement containing the term "sterilization" is retained in the regulations, and the use of either of the statements authorized is optional with the establishment.

2. Sausage may contain cereal, vegetable flour, vegetable starch, milk or its derivatives, individually or collectively, in quantity not to exceed 3.5 per cent. The amount of added water permitted in the preparation of unsmoked or uncooked sausage remains 3 per cent as heretofore. More water or other moisture may be used in the preparation of sausage which is cooked or smoked, provided that the amount of such water or moisture in the finished product does not exceed 10 per cent.

* Conducts slaughtering.

3. Smoked or cooked sausage containing water in excess of 3 per cent and cereal, vegetable flour, vegetable starch, milk or its derivatives may be designated "Sausage, cereal added," "Sausage, potato flour added," "Sausage, dried skimmed milk added," etc., as the case may be, thus eliminating reference to the water constituent as previously prescribed. For the present, approved markings bearing such terms as "Sausage, water and cereal" may be used in lieu of the newly authorized markings from which the reference to water is omitted.

4. If any products in casings simulating sausage contain cereal, vegetable starch, vegetable flour, milk or its derivatives, individually or collectively, or water or other moisture, in excess of the limit prescribed for sausage, such product shall be prominently branded "Imitation" on each link or piece, and, in addition, if the product is placed in wrappers, cartons, or other containers, such containers must bear the term "Imitation" in combination with a statement of constituents, as for example, "Imitation, composed of meat by-products, meat, water, dried skimmed milk, cereal, and potato flour."

5. In lieu of the specific names of the animal fat constituents the term "Animal fat" may be employed in the labeling of lard substitutes consisting of a combination of vegetable and animal fats.

6. The revocation of regulation 16, section 1, paragraphs 6 and 7, and the modification of paragraph 2 of this section, renders it unnecessary for the bureau to approve advertisements in newspapers, periodicals, bill-board signs, street-car posters, and similar matter bearing copies or reproductions of the inspection legend. The incorporation of the inspection legend or any abbreviations thereof in advertising matter simulating in size or design labels, tags, or other devices which may be employed in marking meat or products is not permitted.
